

Homeland Security

State Homeland Security Program (SHSP) funds the implementation of the State Homeland Security Strategy to address identified planning, equipment, training, and exercise needs for acts of terrorism.

Urban Areas Security Initiative (UASI) funds the unique planning, equipment, training, and exercise needs of high threat, high density Urban Areas, to build an enhanced and sustainable capacity to prevent, protect against, respond to, and recover from acts of terrorism.

Law Enforcement Terrorism Prevention Program (LETPP) funds intelligence gathering and information sharing through fusion centers; hardening high value targets; planning strategically; continuing to build interoperable communications; and collaborating with non-law enforcement partners, other government agencies and the private sector.

Metropolitan Medical Response System (MMRS)

Program funds an integrated, systematic mass casualty incident preparedness program that enables a first response during the first crucial hours of an incident including mass casualty incidents, agriculture to epidemic outbreaks, natural disasters and large-scale hazardous materials incidents.

Citizen Corps Program (CCP) funds Citizen Corps Councils' hometown security efforts to engage citizens in all-hazards prevention, protection, response, and recovery through personal preparedness, training, exercises, and volunteer service.

Buffer Zone Protection Program (BZPP) funds enhanced security of select critical infrastructures and assets.

Transit Security Grant Program (TSGP) funds security enhancements for intracity passenger rail, intracity bus transit, and ferry systems.

Hospital Resources Services Act (HRSA) funds local hospitals and healthcare facilities with personal protective equipment (PPE).

All Hazards

Emergency Management Performance Grant (EMPG) Program gives States the opportunity to structure individual emergency management programs based on needs and priorities for strengthening their emergency management capabilities, while addressing issues of national concern. States have the flexibility to develop systems that encourage the building of partnerships which include government, business, volunteer, and community organizations.

Emergency Management Preparedness Assistance Grant (EMPAG) Program is a one time appropriation from the Washington State Legislature that funds local governments, tribal governments, regional agencies, regional incident management teams and private organizations during State Fiscal Year 2007 for high impact, short-term emergency preparedness projects.

Equipment

Homeland Defense Equipment Reuse (HDER) Program provides surplus radiological detection instrumentation and other equipment, as well as training and long term technical support, to emergency responder agencies to enhance their domestic preparedness capabilities.

Commercial Equipment Direct Assistance Program (CEDAP) funds the equipment needs of smaller jurisdictions by providing communications interoperability, information sharing, chemical detection, sensors, personal protective equipment, technology, and training in using the equipment, devices, and technology. Awards are made to law enforcement and emergency responder agencies not currently eligible for funding through the Department's Urban Areas Security Initiative grant program.

Notes

NIMS compliance does not guarantee HLS funding and EMD only funds goals/objectives in the State Homeland Security Strategic Plan (www.emd.wa.gov).

See www.grants.gov or www.firstgov.gov for additional grant opportunities.
